

THE PURPOSE OF OUR BUSINESS IS TO PROVIDE CONTINUITY OF ELECTRICAL POWER
TO KEEP BUSINESSES IN BUSINESS.

All Facilities are ISO 9001 Certified

World Headquarters

875 Dearborn Drive
Columbus, Ohio 43085
Phone: +1-614-846-7500
Toll Free: +1-800-635-7300

ISL CLASS 1E

REGULATING ISOLIMITER

SINGLE PHASE 7.5 KVA - 100 KVA

AMETEK[®]
SOLIDSTATE CONTROLS

ISL – CLASS 1E

Single Phase Isolimiter

7.5 kVA - 100 kVA

The ISL Series Ferroresonant regulating transformers are housed in a single system enclosure. These units are designed to accept a widely varying AC input voltage, while simultaneously producing a well regulated, filtered AC output. ISL Series units have a unique characteristic of being short circuit protected so that overloads and short circuits on the secondary side are not reflected back to the primary.

- High reliability - 20 Year & 40 Year Designs Available
- Constructed with entirely passive magnetic components
- Low Audible Noise <65 dBA
- High Efficiency
- 1/4 cycle output ride-through
- Compatible with non-linear loads
- Industrial grade - built to operate in extreme environmental conditions
- For use with Inverter/UPS systems, or in stand alone operations

Model	kVA	Input Amps*				Input Circuit Breaker Ampacity				Output Amps*			Heat Loss BTU/Hr	Dimensions – Inches (mm)**	Weight LBs (kg)

*At Nominal Line

**40-Year Design Dimensions Subject to Change

Certain optional features and/or combinations may require larger cabinets. Contact Factory. Image Shown with optional meters and breakers

General Specifications

Isolimiter		Environmental	
AC Input		Ambient Temperature	0°C (32°F to 104°F)
Voltage	120, 220, 380, 480 1-phase	Relative Humidity	0-95% non-condensing
Range	- 15% to +10%	Operating Altitude	0 to 3000 meters (10,000 ft.)
Frequency*	60 Hz ±1%	Audible Noise:	65-72dB (A) @1.5m typical Addition of drip shield may increase the noise by 1-3dB (A)
		Cooling	Convection <37.5 kVA Forced Air > 50 kVA
AC Output			
Voltage	120, 220, 380, 480 VAC 1-Phase	Cable Entry	Top or Bottom
Regulation	+ 2%		
Frequency*	60	Efficiency	> 88% at full load
Load Power Factor	0.8 to 1.0	Standard Features	
Harmonic Distortion	5% (or less) THD	Circuit Breakers	AC Input
Overload	150% to 200% fault clearing	Indicators and Alarms**	Fan Failure (>50kVA)
Also available in 120/240 VAC 3-wire, 60 Hz and 600 VAC. Consult factory.		Optional Features	
*50Hz available, contact factory		Circuit Breakers	AC Output
**Alarms provide one SPDT contact rated for 3 Amps at 120 VAC		Meters	Voltmeters, Ammeters, and Frequency Meter
		Indicators & Alarms**	Over Temperature, Low AC Output, High AC Output, AC Output Overload
Transformer			
Noise Attenuation	120dB common mode 80 dB transverse mode	Construction	All copper windings, electrostatic shield

Specifications subject to change without notice
